

## Course Description

These courses are intended for all experience levels, and will cover everything from the basics of hydrology to advanced routing techniques and special software tips. We will review the assumptions of modeling surface water flows, with special attention to gauging the validity of those assumptions. (How to avoid the “garbage in, garbage out” syndrome.)

## Format

The program will include a combination of live presentation, illustrated slides, prerecorded materials, and software exercises. Attendees will receive printed copies of the entire program plus a free copy of the HydroCAD Owner’s Manual. **The expanded 2-day program will cover the same basic outline as the 1-day program, with additional time for discussion and hands-on modeling of a real project.**

## Who Will Benefit

This course will sharpen modeling skills that are essential for civil engineers, regulatory and enforcement personnel, stormwater managers, and consultants.

- ✓ You will acquire new skills for applying today’s technology
- ✓ You will produce a better product for your customers
- ✓ You will save time and money
- ✓ Upon completion of the program attendees will receive a “Certificate of HydroCAD Training”

## Your instructors will be:

### Gerald J. Lang, PE

Rockingham County Conservation District  
Retired USDA NRCS State Conservation Engineer

Tricia Mills, Training & Support Coordinator  
HydroCAD Software Solutions LLC

## With Video Presentations by:

Peter Smart, HydroCAD Developer

# HydroCAD Training Seminars

## Woburn, Massachusetts

**Tuesday, June 2, 2009**  
**Intensive 1-day program**

**Wednesday & Thursday, June 3-4, 2009**  
**Expanded 2-day program**

**8:00 AM to 4:30 PM each day**
